

New Year Message of Prof. Dejan Raković

For all followers of holism, I recommend integrative link below, which points to deeper quantum-holographic coded reality at multiple hierarchical levels, with a deep permeation of psychosomatics and spirituality:

[D. Raković, "Quantum-holographic bases of psychosomatics and spirituality: Contribution to comparative exploration of science and religion," SCIREA Journal of Sociology, Vol. 7, No. 4 \(2023\) pp. 235-256; Previously presented in Interreligious Round Table "Religion, Science, Culture: Contribution of World Religions to Science and Culture – Religious Heritage as a Subject of Study at the University of Belgrade", The Office of the Ombudsman, University of Belgrade, 10.06.2013](#)

Of course, the question remains why this world is so organized. Extremely holistically speaking, God created the world with the Laws of Nature and boundary conditions, and then He left everything to evolution with people at its top, who create a network of burdens at the level of Collective Consciousness through their mutual conflicts. In many traditions, that level of the Celestial Empire is anthropomorphically embodied in Satan.

But God has given man the power to pray and change boundary conditions, through the introduction of new portions of vital energy (God's grace in Christianity) to relieve those burdens. And real change is possible only from within through universal repentance and forgiveness (and for earlier generations). This is where man's true freedom and the way back to the Divine primordial source (Salvation of the soul in Christianity) lies.

Practical implications are that the global political, informational and educational goals of Civilization need to be redefined. As I see it, we are all networked throughout our lives with lower levels of collective consciousness, from which we then untie. It is our spiritual task, as if we are in the function of cleansing the accumulated trans-generational burdens of the collective consciousness. So, our portion of collective consciousness is our ultimate target for cleansing.

To all followers of holism I wish hopefully healthier New Year.

Prof. Dr. Dejan Raković
