

New Year Message of Prof. Dejan Raković

Our previously developed quantum-holographic framework of *integrative medicine & transpersonal psychology* seems to provide theoretically fundamental understanding of the nature of *psychosomatic diseases* as well as limitations of their prevention and *healing methods*, by imposing new *healing boundary conditions* in the energy-state space of electromagnetic (EM) quantum-field-related acupuncture system / (individual and collective) consciousness.

It suggests the *three front lines of psychosomatic medicine*: (i) *spirituality and circular (psycho / energy) therapies from all relevant meta-positions*, with the possibility of a potential permanent removal of mutual memory attractors *on the level of collective consciousness*, (ii) *(quantum) holistic medicine and non-circular (psycho / energy) therapies*, which temporarily remove the memory attractors *on the level of the acupuncture system / individual consciousness* and prevent or alleviate their somatization, as a result of negligence on the first level, and (iii) *symptomatic conventional medicine*, which via immunology, pharmacology, biomedical diagnostics and surgery at the physical level prevents or alleviates somatic consequences of carelessness on the first two levels.

It should be noted that the *necessary activities* in the second and third levels, with *neglect of the first level*, would result in *further transfer of memory attractors* on the level of individual and collective consciousness in this and future generations – thus suggesting necessity *to focus on origins of many problems* in psychophysiological development of a child on *underlying prenatal trans-generational levels* (as suggested by *experiences of clients in post-hypnotic regressions* as well).

Everything considered above might also be of fundamental importance in *understanding underlying macroscopic quantum-informational Hopfield-like holographic acupuncture system* / (individual and collective) consciousness EM field-related biofeedback control mechanisms of embryogenesis / ontogenesis and morphogenesis via *downward influence on the expression of genes* – shedding new light on the long standing open problems of the acupuncture system & consciousness as well.

In this context, I recommend to your attention the link [On quantum-holographic bases of psychophysiological development of a child](#) on my DRF website.

To all followers of holism I wish healthy and productive New Year.

Prof. Dr. Dejan Raković
