A MEDICAL DOCUMENTATION
IN SPIRITUAL HEALING

Dr. Med. Matthias Kamp

Healing the Spiritual Way

*Through
the Teachings
of Bruno
Gröning*

*A concise, systematic review of healings
experienced world-wide in the communities
of the Bruno Gröning Circle of Friends.*

Matthias Kamp

*Medical Director of the Medical-Scientific Group of Specialists
of the Bruno Gröning Circle of Friends*

Mass healings, which took place through Bruno Gröning, stirred the ghosts of the 1950s. His life journey ended in 1959, but his words „There is no incurable, God is the greatest physician" are confirmed by medically documented healings.

A DOCUMENTARY FILM

The Phenomenon of Healing

The Worldwide Activities of the
Bruno Gröning Circle of Friends

Three-part documentary film “The Phenomenon of Healing“ (98/92/102/ total of 292 minutes) describes convincingly the healings after Bruno Gröning’s death in 1959. After the film’s premiere on March 1, 2015 in Berlin, Munich and Vienna, the film is shown monthly in the Circle of Friends of Bruno Gröning around the world.

The World Peace Prayer Society (WPPS) on May 23, 2013 honoured the more than 30-year dedication of the Bruno Gröning Circle of Friends, in the ecumenical Tillmann Chapel of the United Nations in New York.

Bruno Gröning (1906-1959), the most famous spiritual healer of the 20th century, even as a boy had the ability to treat people and animals with his presence, and with his kindness and selflessness he completely overshadowed all who were around him. Individual cases of healing would be impossible to cite, but what must certainly be stated is **mass healings** during his lectures on faith. Up to 30,000 people would be gathered there, and the doctors who were in mass would also witnessed biblical cases of healing. Many incredible records in the press and reports of witnesses of that time speak of how the immobile ones strayed from wheelchairs, or blind people regained their sight after these lectures.

In 1949 this led to appearance of the name of Bruno Grenning in the wider German public, in which the Bruno Gröning case was often treated controversially. Priests, doctors, journalists, lawyers, politicians and psychologists all spoke of Bruno without exception. His miraculous healings were for one merciful gift of greater force, and for other charlatans. However, the truth of healing has been proven by medical research. Scientific examination of his performance, at the University Clinic in Heidelberg, led by a famous neurologist prof. Weizsacker, confirmed these healings. In the eyes of scientists, medical incurable diseases disappeared without anyone being able to explain how.

Many ancient peoples have talked about the **vital energy** supplying the human body and on which its work depends. The Old Chinese called this energy **chi**, and they knew that it was flowing through special channels / meridians, supplying all the organs. As the old Chinese doctors have perceived, a disease occurs when there is an interference in the flow of this energy through the meridians. The Old Indies called this energy **prana**, as all-encompassing energy that a man can receive in himself as a living force.

Similarly Bruno Gröning spoke, only in his case this energy originated from God and he called it "*healing stream / energy*" (**Heilstrom**). It is necessary that the seeker of help (with a mental request to Bruno to take all his burdens!) sits with his palms facing up, without crossing his arms and legs in order that received healing stream flow remained unbroken. It is also needed that a person is no longer in his thoughts obsessed with the disease, and it should be thought that *there is no "incurable" for God*.

When this healing stream flows through the body, it passes through the organs that are loaded with disease, and then comes to cleaning and healing. This can result in severe reactions (pain, vomiting, diarrhea, fever, etc.) as a sign of "*regulation*" (**Regelungen**) of disturbed physical and mental functions, after which, sooner or later, there comes physical and spiritual healing. In order to keep the healing stream flow, everyone must "*open*" / "*adjust*" (**Einstellen**) on it twice a day regularly.

The basic principles of the healing power of Bruno Gröning are:

"I am nothing, Lord God is everything."

"The greatest doctor for all people is and the Lord God remains."

"Believe and trust in God's power to heal and help."

"Do not ask anything, but accept everything."

These quotations contain *the essence of healing by the spiritual path*. God is life. He sends the life power that created everything and keeps everything alive. The man must only learn how to consciously attain that power. Man is more than just a body. He is a spirit, has a soul, and during his lifetime lives in the body. His job is to maintain the body in a healthy state. *For a healthy life, not only food is sufficient, but it also requires spiritual energy*. It cures and helps, not a man. Pray in the right way and believe in this is prerequisite for healing. Each request cuts an invisible connection with a higher force.

Those who asked for help from him, Bruno Gröning did not allow to say one word about their illnesses. All he wanted was to explain to them and help *re-establish the connection with the healing power* and to experience its effect on them. Bruno Gröning saw himself a *spiritual mediator, a healing channel*, not a healer. For this reason, he personally refused any gratitude. *"Do not thank me, but God. This is His work."*

Destiny wanted a man who healed thousands of people, to suffer from "injustice" and to die from it. During a series of court processes against him, which have never been completed, he has been forbidden to perform mass healing and to hold lectures. He announced and predicted it, by saying: "If I am forbidden in the action, I will be burnt inside."

By his work and the miraculous changes he brought into people, Bruno Gröning continued to spiritually live much longer than his physical, earthly life. He lives through special associations of people created on the basis of his lectures called "***Bruno Gröning Circle of Friends***", which exist throughout the world, on almost all continents, and continue to convey the teaching that has brought and *still leads to numerous physical and spiritual healings*.

Membership in Bruno Gröning Circle of Friends is voluntary and free of charge, and independent of national, ideological or religious affiliation. All activities are carried out without any financial compensation, and all costs are covered from voluntary contributions. Bruno Gröning never asked for money, which is a rarity in the world with obsessive money. It could be said that he was one of the few who could be called free.

COMMENT 1. Our holistic research on **quantum-holographic / quantum-gravitational framework of consciousness & psychosomatics**, is in line with **increased scientific interest for consciousness** in past decades, anticipating **great synthesis** of two modes of knowledge, **rational-scientific** (classically-reduced, in normal states of consciousness) & **creative-religious** (quantum-entangled, in transitional and altered states of consciousness).

Thus the **role of every individual** might become **irreplaceable** due to influence and care for **collective mental environment**, leaving most space for **free will**. This would point to **full significance of holistic education & behaviour** – demonstrating **necessity for redefining global educational / informational / political goals**, with reorientation towards **holistic gentle actions for solutions of the global risk society**.

Decisive role in this process could be played by **all religious communities & transpersonal spiritual practices**, cultivating a true **spiritual moral** and absolute inter-personal, inter-ethnic and inter-religious **tolerance**, as a measure of individual behaviour from the **perspective of death**, i.e. amount of generated and non-reprogrammed psychosomatic conflicts until death – which determine the **spiritual evolution** of the soul of the deceased as well as the **preferences** of the individual and / or collective future of the descendants, that can be **significantly altered** only via **collective prayer** for our neighbors and enemies and thus **global reprogramming of collective consciousness**.

Bruno Gröning teaching, as **efficient & safe channel of healing individual & collective consciousness**, is very important step in this direction.

COMMENT 2. My formulation of **addressing Bruno for personal healing:**

My God, thank you for all Your support so far, and I pray to spare us of oversized further temptations too! Thank you also for all Bruno's support!

Dear Bruno, please take all my loads, not only created during my lifetime but also those inheritad via mother's and father's family lines!

Dear Bruno, please take all these loads for my most good! Please take them in accordance to your powers, God's will and God's grace!

Thank you, my God! Thank you, dear Bruno!

*In this paryer the first passage **addresed to God** is essential because of **gratitude** for all optimizations of personal life programs so far and in future. The second passage **addresed to Bruno** is essential for removing all roots of personal life problems, including trans-generational ones. The third passage **addresed to Bruno** is essential for **insurance of spiritual optimization** of personal life program. The fourth passage is essential because of **gratitude** for all future optimizations of personal life programs.*

Addressing Bruno for healing of the others (relatives, friends, enemies...) can be reformulatied similarly.

These addressings are desireable to be practiced by all, for optimizing personal & collective life programs in family & environments.

PRENATAL PSYCHOLOGY 100 YEARS

A JOURNEY IN DECODING HOW
OUR PRENATAL EXPERIENCE
SHAPES WHO WE BECOME!

EDITORS: JON RG TURNER, TROYA GN TURNER, OLGA GOUNI

Author is dealing with the research and educational work in the fields of integrative biophysics, quantum medicine and quantum-holographic informatics for many years, and as a connoisseur of classical and quantum physics explains biophysical phenomena and provide arguments for the application of integrative biophysical diagnostic and therapeutic methods and techniques in medicine.

Bearing in mind that contemporary research indicates the increasing presence of psychosomatic factors in the origin of many diseases, then the inclusion of psychological phenomena (consciousness, stress, etc.) oriented to the treatment of man as a whole and not of diseases as symptoms, represents a shift in the diagnosis and treatment of human health, in respect to the classical medicine. The book also makes a shift in the field of traditional medicine, as it provides a satisfactory explanation for the application of some traditional methods and techniques...

The monograph is of the multidisciplinary character and is primarily dedicated to open-minded physicians who practice classical and traditional medicine, to specialists and students of the postgraduate studies in biophysics and biomedical engineering, as well as to all those interested in the application of new scientific methods and techniques in medicine...

– Djuro Koruga

According to the structure and contents, the book can be equally classified into a higher educational textbook, but also into a very advanced and specific (by issue and research approach) multidisciplinary (physics, biology, medicine, philosophy) scientific monograph.

The book offers a broader and deeper information about hot development of the biophysics of consciousness at the end of the 20th century and the beginning of the 21st century, which is not only of fundamental importance, but allows a wide implementation, from the genetic to biomedical engineering. In order to understand physics of living nature the whole tool of modern theoretical physics is used, in all levels: from molecular, via cellular and over-cellular, to bodily level, including the biosphere as a whole. Therefore, to help readers the appendices on quantum mechanics, quantum chemistry, and quantum informatics are added.

Generally speaking, before the readers is a unique book-monograph...

THE HOLOGRAPHIC UNIVERSE

MICHAEL TALBOT

A Remarkable New Theory of Reality that Explains:

- the Latest Frontiers of Physics
- the Paranormal Abilities of the Mind
- and the Unsolved Riddles of Brain and Body

JOHN C. LENNOX

NEW
UPDATED
EDITION

GOD'S UNDERTAKER HAS SCIENCE BURIED GOD?

There is a crucial important debate that the - atheist versus religion. But it needs to begin again, with clear understanding of what science and religion actually are. Lennox has done this wonderfully.

John Lennox, The Telegraph

An astonishing demolition of Dawkins's argument from biology and religion.

William Miller, The Telegraph

Michael Talbot (1953-1992) is the author of numerous books enlightening parallels between ancient mysticism and quantum theory. In "*The Holographic Universe*", published in 1991 just before the author's premature death, Talbot is relying on research of the famous scientists, quantum physicist *David Bohm* & neurophysiologist *Karl Pribram*, who point out that the Universe ***might be giant hologram***, a sort of the ***mind construct on the boundary subject / object*** – relativizing the question *whether objective reality exists or fluctuates constantly between **implicate & explicate orders!**?*

In "*The Holographic Universe*", Michael Talbot (psychic himself!) points out that numerous (in the book well documented) ***mysterious phenomena:***

synchronicity & lucid dreams & eidetic images & multiple personalities, aura seeing and therapy & visualizing, hypnotic and miraculous healings, mystical religious experiences & out-of-body & near-death experiences, psychometry & precognition & extrasensory perception, psychokinesis & materialization & teleportation,

might be explained within (still controversial) ***holographic paradigm.***

STATES OF CONSCIOUSNESS IN ESOTERIC PRACTICE

Petar Vujičin

*The future belongs to those who can
think beyond the current paradigm*

Abstract. This paper argues that the study of the phenomenon of consciousness, and specifically of human states of consciousness, unlike the very recent preoccupation of the Western science with this problem, can be traced back to almost three millennia ago when it was investigated and personally explored by the sages of ancient India, who left behind written documents of their findings, which we know today as the Upanishads. The esoteric lines of other world's major religions have also pursued the investigation of consciousness in their own spiritual traditions as the most important subject-matter of all, arriving at virtually identical experiences and conclusions as the Upanishadic seers as to the nature of consciousness. The paper is focused on a comparative presentation of two esoteric practices which have been most articulate in the description of the results of their research: Upanishads, known under the collective term Vedanta (Hinduism) and esoteric Christianity as taught by a contemporary, venerable Cypriot mystic, simply called Daskalos (teacher). The striking correspondences between these two traditions have been found in all of their aspects, from the macrocosm, the structure of the Universe, to the microcosm, the structure of human selfhood, human bodies, human states of consciousness, and precise techniques for expansion and attainment of higher states of consciousness. Also, a brief comment is made on the psychic phenomena in the esoteric tradition, as well as on the research of these phenomena carried out by Western scientists. Finally, it is maintained that a conscientious implementation of esoteric disciplines and codes of behaviour in the many aspects of human life, personal and social, is the most efficient way for eliminating all evils (wars, crimes, poverty, illnesses, and diseases, unhappiness) that have beset humanity throughout its long history.

QUANTUM-HOLOGRAPHIC BASES OF PSYCHOSOMATICS & SPIRITUALITY: CONTRIBUTION TO COMPARATIVE EXPLORATION OF SCIENCE & RELIGION

Dejan Raković

Abstract. We hereby focus on the quantum-holographic bases of psychosomatics and spirituality. This is of special importance due to the widespread use of integrative medicine in developed countries – as contemporary research of psychosomatic diseases suggests necessity of holistic methods (focusing on the body's acupuncture system and consciousness), oriented to treating man as a whole and not of disease as a symptom of disordered whole, implying their macroscopic quantum origin – with significant global psychosomatic implications of the necessity of including three front lines of integrative psychosomatic medicine. The aforementioned studies are in line with re-awakened interest in the scientific study of consciousness in recent decades (with indications of appearance of the grand synthesis of the two modes of knowledge, indirectly-rational and directly-mystical, in the framework of a quantum-holographic paradigm) – where the role of each individual becomes indispensable due to the influence and care for collective mental environment, which is fundamental question of mental hygiene and civic decency, or spiritual and civic morality. It should be noted that three essential aspects of any comparative study of science and religion are hereby included: utilitarianism and / or limitations of psychosomatic transpersonal practices of tribal traditions, meditation practices of the East, and prayer practices of the West, in healing or salvation of souls; epistemology of the two modes of knowledge, indirectly-rational and directly-mystical; and phenomenology of transpersonal-mystical, near-death, out-of-body, and extrasensory states of consciousness.

ON QUANTUM-HOLOGRAPHIC AND TRANS-GENERATIONAL IMPLICATIONS FOR CHILD DEVELOPMENT

Dejan Raković

Abstract. Our previously developed quantum-informational framework of psychosomatics seems to provide theoretically fundamental understanding of the nature of psychosomatic diseases as well as limitations of their prevention and healing methods, by imposing new healing boundary conditions in the energy-state space of the EM quantum-field-related acupuncture system / (individual and collective) consciousness – suggesting three front lines of psychosomatic medicine: (i) collective consciousness, (ii) acupuncture system / individual consciousness, (iii) somatic level. It should be noted that the necessary activities in the second and third levels, with neglect of the first level, would result in further transfer of memory attractors on the level of individual and collective consciousness in this and future generations. This suggests necessity to focus on origins of many problems in child development on underlying prenatal trans-generational levels, and might be inspiring for wider applications of transpersonal holistic approaches and techniques in improvement of child development.

Tesla's Inspired Holistic Ideas

www.tesla2017.com

$$|\Phi\rangle_S |\Psi\rangle_E \rightarrow \sum_i c_i |\Phi_i\rangle_S |\Psi_i\rangle_E \xrightarrow{p_j = |c_j|^2 \approx 1} |\Phi_j\rangle_S |\Psi_j\rangle_E$$

Figure 2. (a) Symbolic representation of mentally controlled-directed increasing of macro-quantum correlations of interacting individual consciousness (S) & collective consciousness / environment (E) in *transpersonally-entangling creative phases* (left-hand side of image & formula above, with previous mental increase of focused weight contribution c_j & subsequent (practically non-stochastic) classically-reduced selection of this dominant weight contribution c_j); (b) Symbolic representation of mentally controlled-systemic decreasing of macro-quantum correlations of interacting individual consciousness (S) & collective consciousness / environment (E) in *transpersonally-disentangling spiritual phases* (right-hand side of image & formula above), with previously systemic mental decreasing of almost all weight contributions c_i & subsequent (practically non-stochastic) classically-reduced selection of the remaining weight contribution c_j (related to mentally-embedded address on the founder of the corresponding mystical tradition).

TESLA'S LEGACY FOR NEW MILLENNIUM: PATH TO QUANTUM-HOLOGRAPHIC PRIMAL SOURCE

Dejan Raković

Abstract. Nikola Tesla is undoubtedly the greatest inventor in the history of electrical engineering, and what makes him especially fascinating was his unusual mental control of creative visions. Regarding presented Tesla's extraordinary creative experiences in his altered states of consciousness (categorized in his time as nonphysical phenomena) – Tesla's conviction "when we start to study nonphysical phenomena, we will progress more in ten years than we have for centuries" then becomes clearer. In this context, it seems that Tesla's legacy for the new millennium is introspective evidence of his transpersonal creative communications, with fascinating possibility of his meditative eidetic control & increase of macroscopic quantum correlations with the quantum-holographic primal source of collective consciousness. In this lecture it will be pointed out that they could serve as an extraordinary case study for understanding biophysical basis of both transpersonal psychology & control of creative processes, based on subtle interplay of normal & transitional & altered states of consciousness in meditation & sleep, which may help in developing future strategies for education. These insights could also provide deeper understanding of Hopfield-like neural-networks quantum-holographic framework for quantum-informational transpersonal psychosomatics, based on decrease of quantum entropy & macroscopic quantum correlations of acupuncture system / individual consciousness & collective consciousness, which may help in developing future strategies for integrative medicine & transpersonal psychology. In wider context, Tesla's whole research & life could also provide an inspiration for reconsideration of global educational / informational / political goals – with reorientation towards holistic gentle actions for solutions of the global risk society.

MACROSCOPIC QUANTUM EFFECTS IN BIOPHYSICS AND CONSCIOUSNESS

D. Raković, M. Dugić, M. M. Ćirković

Abstract. It is shown that investigations in the field of microwave resonance stimulation of the acupuncture system, as well as investigations of the interactions of consciousness with microscopic and macroscopic environment – imply the existence of local and nonlocal macroscopic quantum biophysical effects, with great potential implications in medicine, psychology, biology, physics, engineering, and philosophy / religion. The parallels between classical and quantum Hopfield-like neural networks were also emphasized, as well as biophysical quantum-relativistic model of altered and transitional states of consciousness, the roots of relative metatheory of consciousness in the quantum decoherence theory, and anthropic "coincidences" in classical and quantum cosmology.

ON MACROSCOPIC QUANTUM PHENOMENA IN BIOMOLECULES AND CELLS: FROM LEVINTHAL TO HOPFIELD

D. Raković, M. Dugić, J. Jeknić-Dugić, M. Plavšić, S. Jaćimovski, J. Šetrajić

Abstract. In the context of the macroscopic quantum phenomena of the second kind we hereby seek for a solution-in-principle of the long standing problem of the polymer folding, which was considered by Levinthal as (semi) classically intractable. To illuminate it, we applied quantum-chemical and quantum decoherence approaches to conformational transitions. Our analyses imply the existence of novel macroscopic quantum biomolecular phenomena, with biomolecular chain folding in an open environment considered as a subtle interplay between energy and conformation eigenstates of this biomolecule, governed by quantum-chemical and quantum decoherence laws. On the other hand, within an open biological cell, a system of all identical (non-interacting and dynamically non-coupled) biomolecular proteins might be considered as corresponding spatial quantum ensemble of these identical biomolecular processors, providing spatially distributed quantum solution to a single corresponding biomolecular chain folding, whose density of conformational states might be represented as Hopfield-like quantum-holographic associative neural network too (providing an equivalent global quantum-informational alternative to standard molecular-biology local biochemical approach in biomolecules and cells, and higher hierarchical levels of organism, as well).
