Abstract. The paper first discussed the incredible experiences of Bruno Gröning (1906-1959), the most famous spiritual healer of the 20th century, and his nowadays spiritual followers organized in "Bruno Groening Circle of Friends". All of this is then put into the broader theoretical context of our transpersonal quantum-holographic theoretical framework of consciousness and psychosomatics, with numerous holistic implications. All this points to important policy considerations, demonstrating the necessity of reorientation towards holistic subtle actions for global solutions of the world risk society.

Keywords: Matthias Kamp's book "Bruno Gröning – A Revolution in Medicine"; Spirituality; Integrative Medicine; Transpersonal Psychology; Acupuncture System; Consciousness; Vital Energy; Quantum-Holographic Informatics; Policy Considerations

1. Introduction

In the 1950s, the healings that occurred through Bruno Gröning kindled the feelings of millions. He died in 1959, but even today his words, "There is nothing incurable, God is the greatest physician", are still proving their validity through medically documented healings. At the present time, thousands of people continue to experience help and healing through his teaching. The author Matthias Kamp – a medical doctor by profession – has personally verified many healings. Through many years of research into the effect of Bruno Gröning's work, he has come to recognize in it a "Revolution in Medicine" [1].

Bruno Gröning (1906-1959), the most famous spiritual healer of the 20th century, even as a boy had the ability to treat people and animals with his presence, and with his kindness and selflessness he completely overshadowed all who were around him. Individual cases of healing would be impossible to cite, but what must certainly be stated is *mass healings* during his lectures on faith. Up to 30,000 people would be gathered there, and the doctors who were in mass would also witnessed biblical cases of healing. Many incredible records in the press and reports of witnesses of that time speak of how the immobile ones strayed from wheelchairs, or blind people regained their sight after these lectures.

In 1949 this led to appearance of the name of Bruno Grenning in the wider German public, in which the Bruno Gröning case was often treated controversially. Priests, doctors, journalists, lawyers, politicians and psychologists all spoke of Bruno without exception. His miraculous healings were for one merciful gift of greater force, and for other charlatans. However, the truth of healing has been proven by medical research. Scientific examination of his performance, at the University Clinic in Heidelberg, led by a famous neurologist prof. Wezsacker, confirmed these healings. In the eyes of scientists, medical incurable diseases disappeared without anyone being able to explain how.

Many ancient peoples have talked about the *vital energy* supplying the human body and on which its work depends. The Old Chinese called this energy *chi*, and they knew that it was flowing through special channels / meridians, supplying all the organs. As the old Chinese doctors have perceived, a disease occurs when there is an interference in the flow of this energy through the meridians. The Old Indies called this energy *prana*, as all-encompassing energy that a man can receive in himself as a living force.

Similarly Bruno Gröning spoke, only in his case this energy originated from God and he called it "*healing stream / energy*" (*Heilstrom*). It is necessary that the seeker of help (with a mental request to Bruno to take all his burdens!) sits with his palms facing up, without crossing his arms and legs in order

that received healing stream flow remained unbroken. It is also needed that a person is no longer in his thoughts obsessed with the disease, and it should be thought that *there is no "incurable" for God*.

When this healing stream flows through the body, it passes through the organs that are loaded with disease, and then comes to cleaning and healing. This can result in severe reactions (pain, vomiting, diarrhea, fever, etc.) as a sign of "*regulation*" (*Regelungen*) of disturbed physical and mental functions, after which, sooner or later, there comes physical and spiritual healing. In order to keep the healing stream flow, everyone must "*open*" / "*adjust*" (*Einstellen*) on it twice a day regularly.

The basic principles of the healing power of Bruno Gröning are:

"I am nothing, Lord God is everything."

"The greatest doctor for all people is and the Lord God remains."

"Believe and trust in God's power to heal and help."

"Do not ask anything, but accept everything."

These quotations contain *the essence of healing by the spiritual path*. God is life. He sends the life power that created everything and keeps everything alive. The man must only learn how to consciously attain that power. Man is more than just a body. He is a spirit, has a soul, and during his lifetime lives in the body. His job is to maintain the body in a healthy state. *For a healthy life, not only food is sufficient, but it also requires spiritual energy*. It cures and helps, not a man. Pray in the right way and believe in this is prerequisite for healing. Each request cuts an invisible connection with a higher force.

Those who asked for help from him, Bruno Gröning did not allow to say one word about their illnesses. All he wanted was to explain to them and help *re-establish the connection with the healing power* and to experience its effect on them. Bruno Gröning saw himself a *spiritual mediator, a healing channel*, not a healer. For this reason, he personally refused any gratitude. *"Do not thank me, but God. This is His work."*

Destiny wanted a man who healed thousands of people, to suffer from "injustice" and to die from it. During a series of court processes against him, which have never been completed, he has been forbidden to perform mass healing and to hold lectures. He announced and predicted it, by saying: "If I am forbidden in the action, I will be burnt inside."

By his work and the miraculous changes he brought into people, Bruno Gröning continued to spiritually live much longer than his physical, earthly life. He lives through special associations of people created on the basis of his lectures called "*Bruno Gröning Circle of Friends*", which exist throughout the world, on almost all continents, and continue to convey the teaching that has brought and *still leads to numerous physical and spiritual healings*.

The *World Peace Prayer Society* (WPPS) on May 23, 2013 honoured the more than 30-year dedication of the Bruno Gröning Circle of Friends, in the ecumenical Tillmann Chapel of the United Nations in New York.

Three-part documentary film "*The Phenomenon of Healing*" (98/92/102/ total of 292 minutes) describes convincingly the healings after Bruno Gröning's death in 1959. After the film's premiere on March 1, 2015 in Berlin, Munich and Vienna, the film is shown monthly in the Circle of Friends of Bruno Gröning around the world.

Membership in Bruno Gröning's Circle of Friends Circle is voluntary and free of charge, at all times, and independent of national, ideological or religious affiliation. All activities are carried out without any financial compensation, and all costs are covered from voluntary contributions.

2. On Extended QHQG Framework Of Bioenergycorrection

Bioenergycorrection as an ancient way of correcting *vital energy* flow is well known in many multi-millennial traditions, having withstood the test of time to this day, with some modern modifications [2,3]. On the wave of the expansion of *integrative medicine* since the mid-1990s in China, the US and Europe, some *bioenergycorrection techniques* have been subjected to *scientific research* and have been included in the *curricula* of medical schools therein. So, although the vital force theory was discarded in organic

chemistry of 19th century, nowadays it seems to return modified into science via *integrative medicine* [4] and *transpersonal psychology* [5].

In the context of our extended *quantum-holographic / quantum-gravitational (QHOG) theoretical framework of the acupuncture system, consciousness, and vital energy* [6-8], their *biophysical energy-informational nature* was considered from the three aspects: (i) *Quantum-informational electromagnetic aspect* of the acupuncture system is suggested by *quantum-coherent characteristics* of the *microwave resonance therapy* and the discovery that any quantum system has formal mathematical structure of the *Hopfield-like quantum-holographic associative neural network*, while close relationship of the *acupuncture system and consciousness* is suggested by their *macroscopic quantum nature* and very effective *meridian (psycho / energy) therapies*; (ii) *Quasi-classical ionic aspect* of the acupuncture system is suggested by research of the non-threshold "*gap junction*" *electrical synapses*, which have shown an order of magnitude increased their concentration at the acupuncture points, that is consistent with a much lower electrical resistance of the acupuncture points compared to the surrounding tissue, as well as a significantly higher absorption of ions in these points; (iii) *Transpersonal exotic aspect* of the energy-information communications is suggested by *established and stabilized energy-information channels of vital energy (qi, ki, prana...)* known in all traditions and widely used in *transpersonal energy therapies (Qigong, Reiki, Pranic healing...)*, pointing to a deeper exotic space-time nature of these energy-information channels (i.e. connection with exotic quantum vacuum fluctuations, necessary for anti-gravitational stabilization of the space-time channels).

Consequently, our extended *QHOG theoretical framework* might have significant holistic implications, providing better understanding of the *nature of psychosomatic diseases* and their *prevention and healing*, which might help in *developing strategies for integrative medicine and transpersonal psychology*. Within this framework, it appears that all holistic acupuncture-based and consciousness-based approaches and techniques can be treated as *quantum-informational therapies*, by *imposing new healing boundary conditions* in the energy-state space of the *acupuncture system / (individual and collective) consciousness*, on the *three front lines of integrative psychosomatic medicine*: (i) *Spirituality and circular (psycho / energy) therapies from all relevant meta-positions*, with possibility of permanent erasing of mutual memory attractors on the *level of collective consciousness*; (ii) *(Quantum) holistic medicine and non-circular (psycho / energy) therapies*, whose efforts temporary erase memory attractors on the *level of the acupuncture system / individual consciousness*, and prevent or alleviate their somatization, as a consequence of the indolence on the first level; and (iii) *Conventional symptomatic medicine*, whose activities on the *somatic level* via immunology, pharmacology, biomedical diagnostics and surgery hinder or soothe somatized consequences of the carelessness on the first two levels.

3. On Extended QHOG Framework Of Transpersonal Phenomena

Consequently, in the context of our extended *QHOG theoretical framework* [6-8], biophysical origin of *vital energy (chi / qi / ki, prana / akasha, mana, ka, pneuma / eter / natura medica / anima mundi / vital force, yesod, baraka, unreated light, Holy Spirit, Heilstrom, Innate Intelligence, bioenergy / biofield)* should be sought within *EM-ionic-exotic macro-quantum nature of the acupuncture system / consciousness*. Besides, esoteric notions like *astral body (manomaya, lingasarira, manovijnana, ka, psyche, nephesh, nafs, subtle body, psychic body, soul...)* and *mental body (vijnanamaya, suksmasarira, manas, ba, thymos, ruach, ruh, noetic body, spiritual body, spirit...)* might be biophysically related to *out-of-body displaced part (connented with the body by the miniature 'wormhole' spatio-temporal tunnel / 'silver chord' of vital energy of the astral-mental body, as indicated by extrasensory near-death experiences)* of the *ionic acupuncture system*, and within it embedded *quantum EM component* of the ionic currents, respectively. On these lines, the *ionic condensations* of the structured acupuncture system, with embedded *quantum EM component* of the ionic currents, behave like *distributed centers of consciousness* – which might be biophysical nature of *chakras* (where *vital energy* in normal state *circulates* clockwise, and slows down in the case of psychosomatic disorders, with possibility of even counterclockwise circulation in the case of most difficult diseases). In wider context of *collective*

consciousness and vital energy (in line with their wider traditional relationship with all-pervading cosmic quintessence), the mentioned above relationship with the *EM field* can be generalized to relationship with the *unified field*, and its different micro-quantum and macro-quantum (non-biological and biological, non-structured and structured, and virtual and real) excitations. Additionally, if put in the context of the *holographic principle* [9], according to which each (3D) physical system is *isomorphic* to holographic information imprinted on its (2D) surface, then *quantum-holographic information about each body* could be imprinted in the corresponding *surface layer of the astral-mental body of vital energy (aura)*, as claimed in different traditions.

We emphasize that numerous *transpersonal phenomena* associated with *consciousness* and *psychosomatic bioenergy correction* are phenomenologically well documented, and that their *physical explanation* should be sought at the very border of the existing *scientific paradigm*. Within our extended *QHQG theoretical framework*, they are of a deeper *quantum-gravitational origin* (according to Einstein's *Principle of equivalence* of inertial and gravitational accelerations!) *in transitional states of consciousness* (from high-dielectric body to low-dielectric out-of-body states!), based on locally generated wormhole tunnels, quantum-gravitationally stabilized by exotic matter (quantum vacuum fluctuations in strongly curved space-time of wormhole tunnels) with *anti-gravitational* effects – really observed in *transpersonal psycho-kinetic manifestations* of vital energy), with *exotic aspects of spatio-temporal tunnels and vital energy extended to acupuncture channels* (of *exotic vacuum-like refractive index!* [17]) with *transpersonal quantum-entangling inflow of vital energy* [6-8,10-16].

4. Discussion On Extended QHQG Framework Of Transpersonal Healing Reprograming

Within our extended QHQG theoretical framework, the *healing effects* on the patient's acupuncture system / consciousness are *often blocked* by quantum-holographically encoded *spiritual personal consent* to the disease as a form of (self) punishment (as evidenced by the subjects' experiences in *post-hypnotic regressions*), when *prayers and self-love* for oneself and others are necessary with the aim of ending (self) punishment – thus performing *spiritual integration of the personality*, i.e. *dis-entanglement of transpersonal energy blockages*, which *triggers the process of permanent trans-generational healing*. Such *spiritual indeterministic interventions* by introducing new vacuum excitations of vital energy in the otherwise deterministic quantum-holographic evolution of collective consciousness (similar to the spiritually-excited and mentally-channeled Ayurvedic, Qigong, Reiki and modern experiences of local and transpersonal healing, thus non-Schrodinger imposing necessary essentially new boundary conditions!) – can permanently remove as a net effect *the whole mutual conflict* between two people, which is also *the greatest source of freedom* in optimizing life programs through spiritual cleansing [6-8,10-16].

In particular, beside previously discussed contemporary spiritual teaching of *Bruno Groening in optimizing both individual and collective life programs* [1], let us mention Hawaiian *ho'oponopono* tradition with *remarkable reprogramming of the life situations by contextual repenting and forgiving ourselves* [18], or South American *ayahuaska* and Nigerian *Abiku* traditions with *fascinating spiritual diagnoses and extensions of the predestined-short-life programs* [19,20], or *fascinating world bestseller of Anita Moorjani on spiritual changing her life program* with return from clinical death and after a few weeks *spontaneous healing of terminal phase of cancer* [21]; or traditional *Christian (hesychastic) Mysticism* with *miraculous healing and optimizing life programs* [22,23]. This significantly contributes to our understanding that *even the most severe psychosomatic disorders have their roots in energy-informational blockages*, and that *healing begins by removing them* – first by loving oneself, accepting oneself and forgiving oneself, which is then manifested by loving others and accepting others (e.g. spiritually dis-entangling / unleashing repentant-forgiving prayer)!

5. Conclusion

Our extended QHQG theoretical framework of consciousness and psychosomatics, in line with increased scientific interest for consciousness in past decades, *anticipates great synthesis of two modes of*

knowledge, rational-scientific (classically-reduced, in normal states of consciousness) and creative-religious (quantum-entangled, in transitional and altered states of consciousness) – where the role of every individual might become irreplaceable due to influence and care for collective mental environment, *leaving most space for free will*. This would point to important policy considerations – demonstrating necessity for redefining global educational / informational / political goals, *with reorientation towards holistic gentle actions for solutions of global risk society*.

Decisive role in this process could be played by *all religious communities and transpersonal spiritual practices*, cultivating true spiritual moral and absolute inter-personal, inter-ethnic and inter-religious tolerance, as measure of individual behaviour from perspective of death, i.e. amount of generated and non-reprogrammed psychosomatic conflicts until death – which determine spiritual evolution of the soul of the deceased as well as preferences of the individual and / or collective future of posterity, that can be significantly altered only via collective prayer for one's neighbors and enemies, and thus *global reprogramming of collective consciousness*.

Appendix. What Else A Reader Needs To Know On Extended QHQG Informatics

According to *prevailing scientific paradigm*, information processing within the central nervous system is occurring through *hierarchically organized and interconnected neural networks* [24]. It seems that this hierarchy of biological neural networks is going down sub-cellular *cytoskeleton* level, being according to some scientists a kind of interface between *neural* and *quantum* levels [25]. On the other hand, as *any quantum system in Feynman's propagator version of quantum mechanics* has formal mathematical structure of the *quantum-holographic Hopfield-like associative neural network* [26] (cf. Fig. 1) – then closely related macro-quantum *acupuncture-based and consciousness-based memory attractors* can be treated as psychosomatic states *representing quantum holistic field records!*

Then, according to our *extended QHQG theoretical framework* all holistic acupuncture-based and consciousness-based approaches and techniques could be treated as quantum-informational therapies, by imposing new bioresonantly exciting healing boundary conditions in the energy-state space of the (open) acupuncture system / (individual) consciousness. However, when this process is hindered by transpersonal entangled blockages in the energy-state space of EM field of the (open) acupuncture system / (individual and collective) consciousness – then memory attractors of quantum-holographic network of the field-related collective consciousness should be removed, cf. Fig. 2. So, this implies necessity to focus on the *origins of many psychosomatic problems* on underlying *prenatal trans-generational levels* (cf. [10-16]).

So, according to the same syncretic framework it seems that all of us during the life are quantum-holographic networked with lower levels of collective consciousness, from which we can and must spiritually disconnect by prayers – as a magnificent task of every soul [27], in cleansing accepted-at-conception the trans-generational portion of burdens of collective consciousness [28]. All this can be facilitated collectively too, provided that each individual must cultivate both modes of cognition (sensory-rational and creative-spiritual) in combination, because if he does not do this, he does not even complete the basic spiritual task, the *re-union with the spiritual source*. In contrast, if Evil (as a manifestation of the quantum-holographic burdens of the collective consciousness) is defeated by force, it continues to exist further in some different historical form (let us only remember the previous historical epochs).

Within the same framework, *spiritually-purifying transpersonal healing* naturally *decreases entropy (quantum entanglement with environment)* i.e. *increases information* (healthy complexity) of the macroscopic quantum psychosomatic system [16] – with *spiritual-informational trans-generational time reversal*. [Let us note that *quantum entanglement experiments* with time-reversed EPR also demonstrate that the quantum history observed may be *retroactively affected* by observations carried out much later [29], with possibility of *radical avoiding* any reference to objective reality altogether, as in the Copenhagen Interpretation.]

In this context, let us add that both traditional and modern experiences of local and transpersonal energy healing [6] (by spiritually-excited and mentally-channeled new macro-quantum portions of vital energy and their subsequent mentally-channeled transfer), indicate that *meditative visualization also imposes new (decoherence-like) quantum gravitational boundary conditions* (however, in contrast to

prayer, it would not eliminate simultaneously all mentally-loaded addresses, but would balance energy-informationally only one particular client; therefore, in such situations, it is necessary to do circular meditative-healing visualization from all meta-positions involved in the existing conflict, thus eliminating simultaneously all mentally-loaded addresses)!

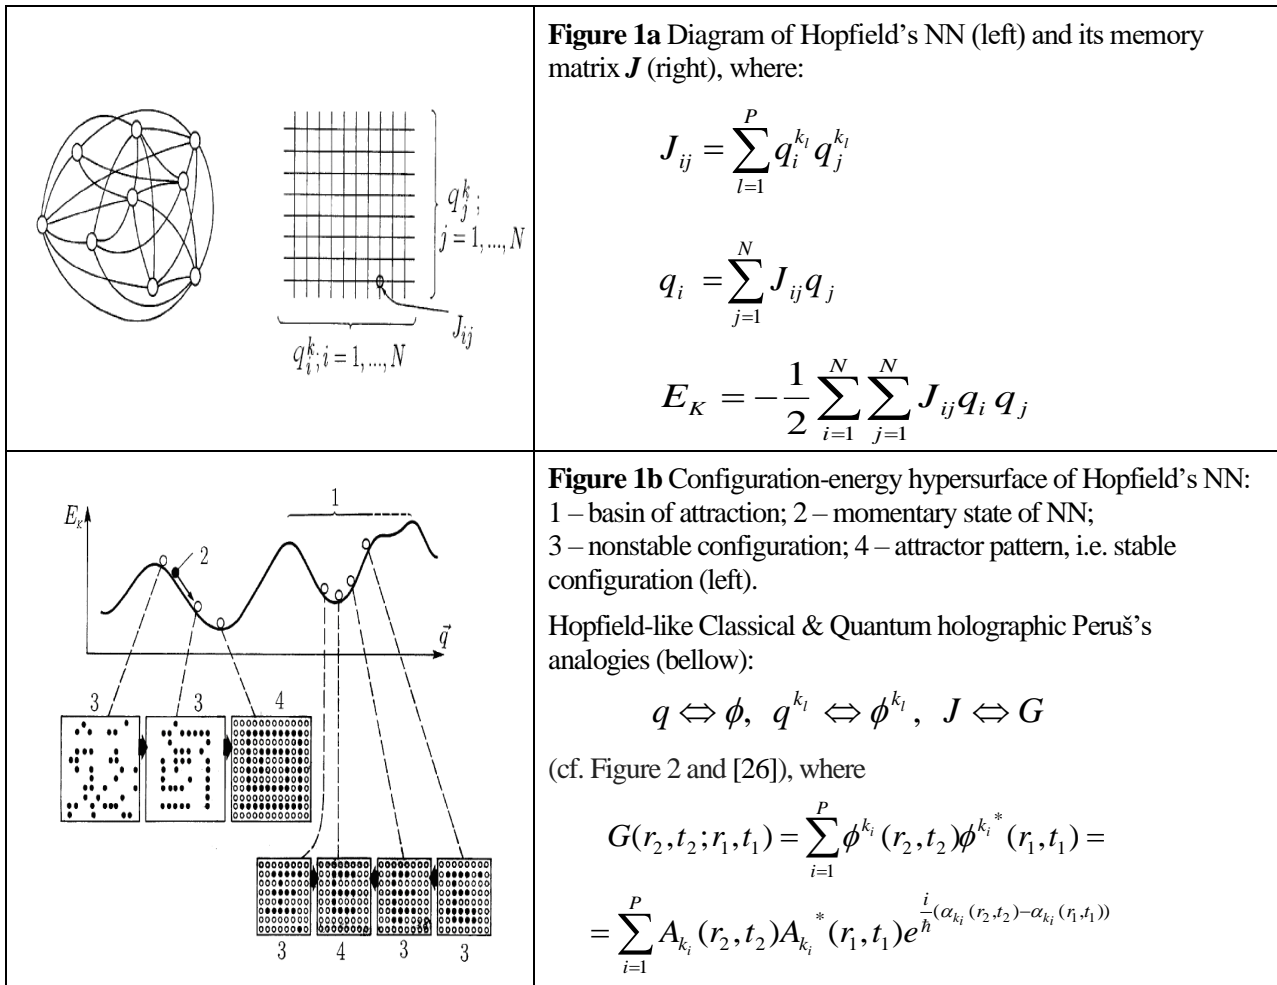

Figure 2. Schematic presentation of the adaptation of memory attractors in the energy-state hypersurface of the quantum-holographic memory / propagator of various hierarchical levels of biological macroscopic open quantum system(s) S_k [6] (local cell's biomolecular protein / target, local acupuncture system / consciousness, or nonlocal out-of-body consciousness / collective consciousness). This implies necessity of quantum-informational successive bioresonant removing of all unwilling side memory attractors (like ϕ^{k_2} in Figure 2), which would otherwise cause development of psychosomatic diseases on the individual level, and interpersonal fights in this and further generations on the collective level.

It is also instructive to mention *Buddhist* interpretation of *karma*, which occurs not as a *result of our spontaneous reaction* to the current situation in life, but as a result of the *latter justification of our conscious reactions against the others* in this situation [30]! In the context of the hypno-regressions suggesting *quantum-holographic predestined life programs* [28], this is fully justified because we all (*non-consciously*) *react to current conflicting-encoded life-situations* (several hundred milliseconds before we become aware [31]!), but immediately afterwards we have a chance to (*consciously*) *permanently untangle the existing trans-generational conflict by penitent-all-forgiving prayer*. This might be possibly the reason for *Christianity* to insist on *repenting and forgiving*, as anything else would enhance the existing mental / emotional personal loads and enlarge Evil in the world, dismissing an individual and humankind from the final spiritual ideal of sinless state of individual and collective consciousness!

As note added in proof of transpersonal interactions *via* miniature wormholes, the "*gauge quantum field theory and quantum gravity correspondence*" of any quantum entangled system (i.e. Einstein-Podolsky-Rosen correlated quantum pair) and created miniature (non-traversable) *wormhole* (i.e. quantum-gravitational Einstein-Rosen bridge) [32] should be pointed out. On the other hand, according to our *extended QHQG theoretical framework* [12], the similar *highly-non-inertial transitional processes* should be expected in *highly non-inertial microparticle interactions* in quantum-measurement-like situations (fully equivalent, according to Einstein's *Principle of equivalence*, to strong gravitational fields – where opening of wormhole-tunnels is expected [33]) – implying also that von Neumann's *ad hoc Projection postulate is based on quantum gravitational phenomena* [12], on deeper physical level than nonrelativistic quantum mechanical ones!

Our extended QHQG theoretical framework might also imply that quantum-holographic hierarchical parts carry information about the whole (which resembles the Hindu relationship *Brahman / Atman*, as a whole and the part which contains information about the whole [12,34], allowing subtle *fractal coupling of various hierarchical levels* in Nature [35]. This might be supported by *acupuncture system and its projection zones* (ECIWO holographic concept [36]) and the discovery of *quantum-holographic influence of verbal communication on the expression of cell genome* (by voice-modulation of irradiating-laser beams [37]), as well as by the *origin of the amazing creativities* (Tesla and Mozart as case studies [38,39]) and *predestined life paths and temptations* (as indicated by the contemporary experiences of hypno-regressions [30] as well as experiences of different traditions [40], while still emphasizing that it is *possible to optimize them by spiritual purification*).

As note added in quantum-holographic proof, we hereby recommend the book *Holographic Universe* to all interested in phenomenology of various states of consciousness, with numerous well-documented mysterious phenomena in altered states of consciousness [41]. In this book, Michael Talbot relies heavily on the works of famous quantum physicist David Bohm and neurophysiologist Karl Pribram, who point out that the *Universe could be a giant quantum hologram*, the type of mind construct at the boundary of a subject / object – by relativizing the question of whether objective reality exists or constantly fluctuates between *implicate and explicate orders*.
